

AHMED FARAZ MALIK

AI Engineer | Python Developer | Software Engineer

Islamabad, Pakistan | 721ahmedfarazmalik@gmail.com | +92 315 1512720 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

BS Information Technology graduate with hands-on experience in AI, Python, and software development. Built AI-powered applications using RAG, LLMs, Flask, and React, along with practical experience in Docker and backend development. Looking for a junior AI or software engineering role where I can contribute, learn, and grow.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

AI & Machine Learning: Generative AI, RAG, LLMs, FAISS

Backend: Flask, FastAPI, REST APIs

Databases: MySQL, MongoDB

DevOps & Tools: Docker, Git, GitHub

PROJECTS

Fake Product Identification Using Blockchain — Final Year Project

- Designed and developed a **blockchain-based product authentication system** using SHA-256 hashing, QR code generation, and supply chain tracking to verify product authenticity and prevent counterfeiting.

RAG Document Q&A Tool

- Built an AI-powered PDF question-answering application, integrating **Hugging Face embeddings** and **FAISS vector search** with the **Gemini API** to deliver accurate, context-aware answers directly from uploaded documents.

YouTube Video Summarizer

- Developed an AI-powered application that extracts YouTube video transcripts and generates concise, accurate summaries using the **Gemini API**.

BulkWise Emailer

- Built a local bulk email application that automates personalized email delivery by parsing and merging recipient data from **CSV** files.

EDUCATION

Bachelor of Science (BS) in Information Technology

National University of Modern Languages (NUML), Islamabad | 2022 – 2026
